

06 - Project Testing

Test Case 1 – Critical Priority

- Action: Select Priority = Critical.
- Expected Result: Description becomes mandatory.

Result: Passed.

Test Case 2 – Normal Priority

- Action: Select a priority other than Critical.
- Expected Result: Description is not mandatory based on the configured condition.

Result: Passed.

Test Case 3 – Software Category

- Action: Select Category = Software.
- Expected Result: Configured software-related field becomes visible or mandatory.

Result: Passed.

Test Case 4 – Other Category

- Action: Select a category other than Software.
- Expected Result: The configured field follows the alternate UI Policy behavior.

Result: Passed.

Test Case 5 – Client Script

- Action: Change the configured Incident field.
- Expected Result: Client Script executes dynamically without refreshing the page.

Result: Passed.

Test Case 6 – UI Policy

- Action: Change the Incident field to satisfy the UI Policy condition.
- Expected Result: Configured fields dynamically change their properties.

Result: Passed.
