

03 - Project Design

System Design

- Incident Form → Client Script → Dynamic behavior
- Incident Form → UI Policy → Field behavior

Client Script

- A Client Script runs on the client side and can dynamically change field values or form behavior.

UI Policy

- A UI Policy controls the appearance and behavior of Incident form fields according to specified conditions.

UI Policy Action

- UI Policy Actions define whether a field is Mandatory, Visible, or Read-only.

Example Design

- Condition: Priority is 1 - Critical.
- Action: Make Description mandatory.
