

07 - Project Documentation

Project Title

- Implement Client Script & UI Policy – Incident

Technology Used

- ServiceNow, Incident Management, Client Script, UI Policy, UI Policy Action, and JavaScript.

Project Objective

- To implement dynamic behavior on the ServiceNow Incident form using Client Scripts and UI Policies.

Key Features

- Dynamic field control
- Conditional mandatory fields
- Conditional visibility
- Read-only field control
- Client-side JavaScript
- Incident form customization

Client Script

- Client Scripts execute JavaScript on the client side and dynamically control the Incident form.

UI Policy

- UI Policies dynamically control field properties such as Mandatory, Visible, and Read-only.

Project Outcome

- The project demonstrates how Client Scripts and UI Policies can work together to create a dynamic and user-friendly Incident form in ServiceNow.
