

08 - Project Demonstration

Demonstration Overview

- The demonstration explains the complete implementation of the Client Script and UI Policy project on the ServiceNow Incident form.

Demonstration Steps

- Login to ServiceNow.
- 2. Open the Incident application.
- 3. Create a new Incident.
- 4. Show the default Incident form.
- 5. Configure the Client Script.
- 6. Explain the Client Script code.
- 7. Create the UI Policy.
- 8. Configure the UI Policy condition.
- 9. Configure UI Policy Actions.
- 10. Change Incident priority.
- 11. Show the dynamic field behavior.
- 12. Change the Incident category.
- 13. Demonstrate the corresponding UI Policy behavior.
- 14. Test the Client Script.
- 15. Test the UI Policy.
- 16. Show the final result.

Project Outcome

- The project demonstrates how ServiceNow Client Scripts and UI Policies dynamically control Incident form fields based on predefined conditions.
